

System overview

 totaraengage

Totara Engage LXP presents a range of new possibilities to transform the way your audiences learn. It enables social, collaborative, user-driven learning to be seamlessly integrated into the everyday. Engaged members of your teams not only learn more effectively but they enjoy the learning process more, delivering higher quality work and greater productivity.

What is an LXP?

LXP stands for Learning Experience Platform. An LXP:

- Complements existing learning management systems.
- Creates a truly personalised learning experience.
- Is driven by the user, is more continuous, fluid and social.
- Encourages knowledge sharing, collaboration and learning in the flow of work.
- Helps to organise and highlight key information across the business, driving efficiencies and saving time.

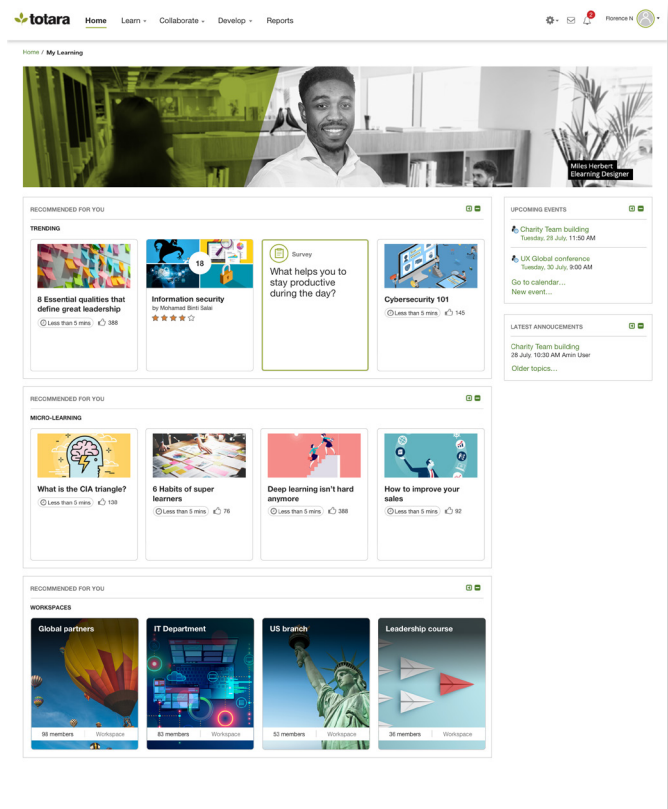

Totara Engage use cases

You can use Totara Engage for:

- Induction & onboarding
- Performance support
- Improve employee engagement and performance
- Coordinate projects
- Recognise and reward employees / gamify learning
- Learn in the flow of work

Key Features

- ✓ **Content curation**
- ✓ **Engagement reports**
- ✓ **Personal libraries**
- ✓ **Collaborative workspaces**
- ✓ **Microsoft Teams integration**
- ✓ **Survey builder**
- ✓ **Machine learning recommendations engine**
- ✓ **Flexible access and sharing settings**
- ✓ **Custom playlists**
- ✓ **Resource library & catalogue**
- ✓ **Personalised notifications**

Engagement

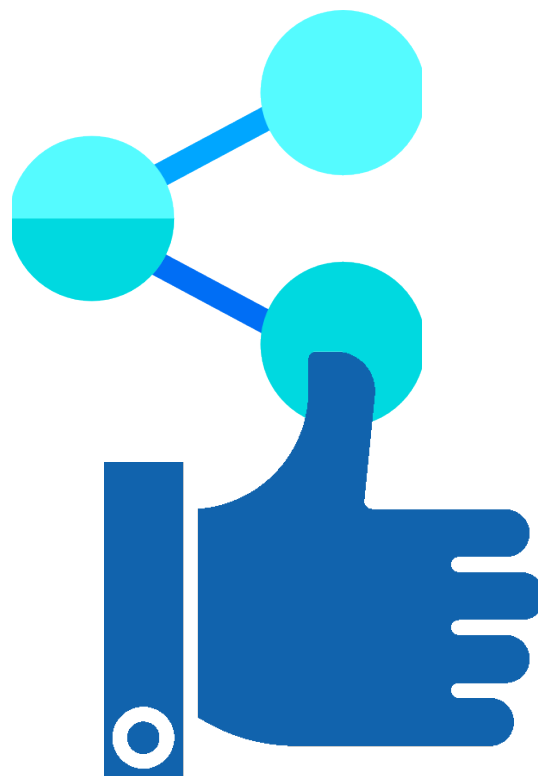

Motivate your staff and keep them engaged in learning.

- Identify talent, engage individuals and groups via engagement reports.
- Offer rewards and recognition to contributors through likes, shares, ratings and more.
- Enable staff to create content and share knowledge.
- Provide personalised, relevant learning recommendations to users through machine learning.
- Create quick surveys for constructive feedback, which promotes inclusion.

Social Learning

Encourage knowledge sharing and build knowledge banks.

- Empower subject matter experts to share knowledge and collaborate on resource creation.
- Enable users to create their own resource library.
- Allow users to like, comment on and share resources created.
- @tag peers to pull people into conversations around topics
- Enable users to collect feedback.

Playlists

Personalise learning and highlight the right resources to the right people.

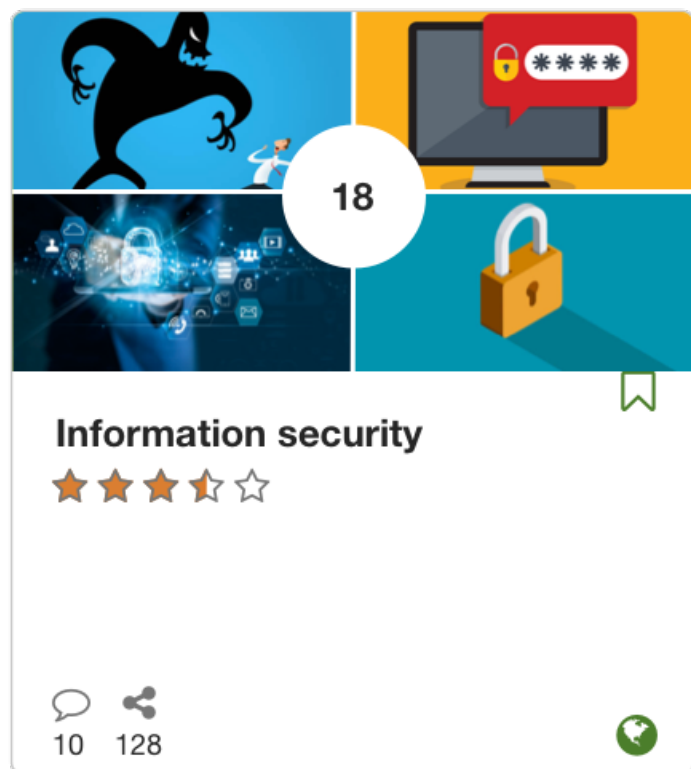

Users and admins can curate a set of resources such as videos, articles and podcasts into a group of resources known as a playlist.

- Drag and drop resources in a playlist.
- Group together related information and support different teams with different requirements.
- Leverage internal expertise by adding their resources to playlists.
- Utilise built in machine learning to provide users with recommendations, related content and relevant playlists.

Catalogue

Simplify how courses are displayed and organise your resources in a smart way.

- Access the learning catalogue to see all resources and playlists.
- Filter by topic, time to read or use the search function.
- Display informal learning content alongside formal courses to fit various learning needs.
- Tailor the look and feel of cards displayed.

Collaborative Workspaces

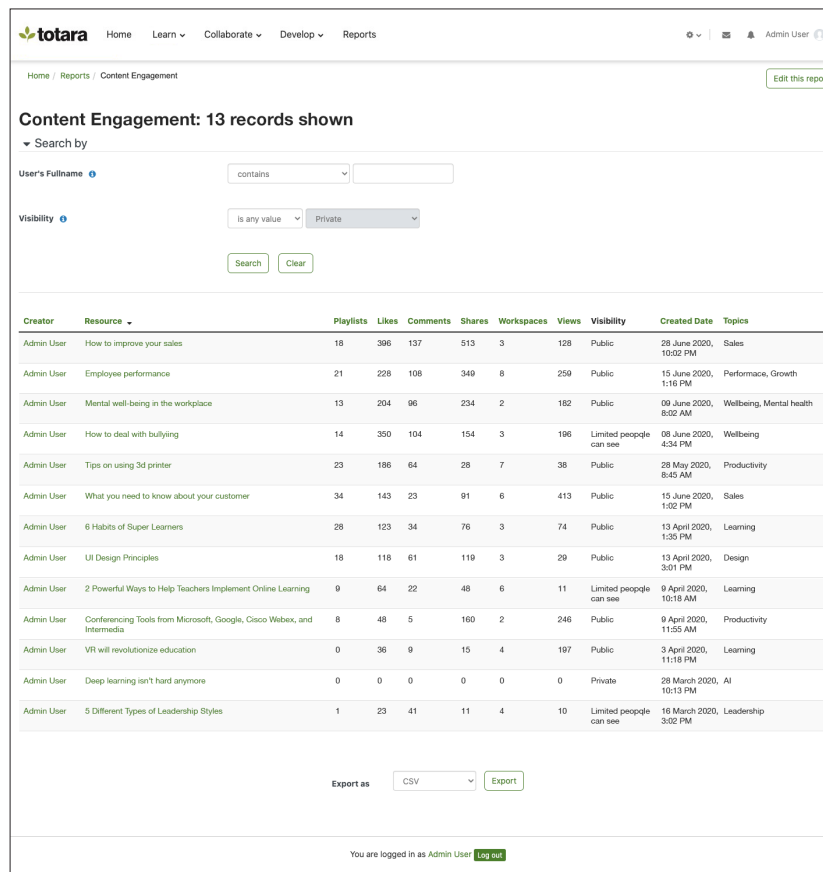

Enable your employees to find the resources they need, right when they need it - helping them to learn in the flow of work.

- Enable public and private workspaces for collaboration on projects.
- Allow users to add resources and playlists to workspaces.
- Empower users to create, share, like and comment on the resources added.
- Remove information silos.

Reporting

Measure engagement.

- Review which resources employees are liking, commenting on and sharing.
- Find out which topics are trending.
- Review user generated content, see what employees are creating.
- Jump into workspaces from reports to review learning.
- Create use reports to find out the areas in which people need more support.
- Automate and schedule reports.

Recommendations

A recommendations engine for personalised learning identifies users' key interests, skills and information needs. This data is used to surface personalised content seamlessly within a user's day-to-day workflows.

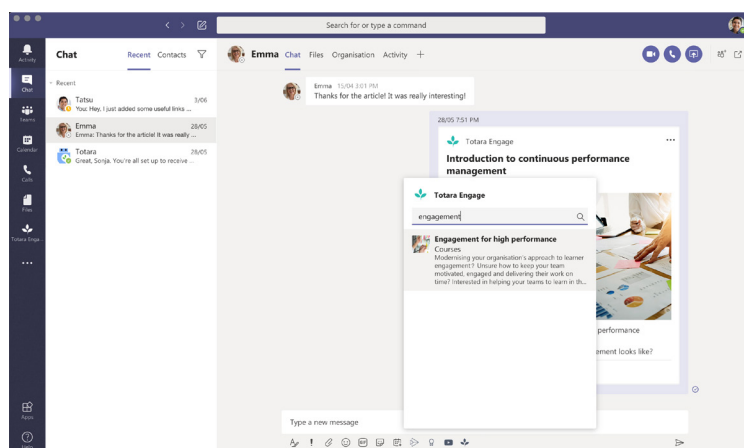

- Enable users to view trending content in their dashboards.
- Trending content can include resources and playlists.
- Highlight recommended micro-learning.
- Highlight workspaces the individual might be interested in joining.
- Hide courses and workspaces that individuals are already taking part in.

Microsoft Teams integration

You can create, curate and collaborate all in the same digital space without any of the complexities that come with using a selection of different isolated tools, enabling employees to learn in the flow of work.

Within Teams you can:

- Jump into the learning catalogue to find resources and playlists.
- Show users their progress and outstanding learning.
- Continue with courses.
- Create and access content and resources.
- Get notifications from Totara.
- Jump straight from a chat to a resource.

Employee surveys

- Use a built-in, quick and easy survey builder.
- Treat surveys as individual resources, which you can share with everyone or select groups.
- Create surveys to understand how a team is feeling about a project.
- Make democratic decisions based on your survey results.
- Ensure everyone in the team feels included.

Totara Learn + Totara Engage

Boost learning programs by harnessing the power of informal learning and collaboration. Combine Totara Engage with the Totara Learn LMS for the ultimate e-learning approach.

- **Complement your formal learning**
Enable learners to support each other and add additional resources to complement any of the formal learning courses on Totara Learn.
- **Get quicker at onboarding**
Provide a more rounded onboarding experience, comprising both formal, structured learning and informal knowledge sharing.
- **Create knowledge banks**
Drive efficiencies, remove information silos and save time with a knowledge bank consisting of FAQs and content curated by subject matter experts.
- **Easily manage change**
Create central spaces that focus on policy changes, relevant industry news, organisational transitions and updates to ways of working.

Ready to start your project?
